

## CODE - Minutes for December 2, 2013

---

Present: Akutsu, Hanna, Antonyappan, Echandia, Gu

1. No quorum at the beginning of the meeting
2. Echandia Shared Executive Senate Meeting – At the meeting, they discussed the last senate meeting regarding IPP. Akutsu gave background of motions that have been on the table regarding IPP. IPP may or may not be viable in the future. AITC discussed proposed policy for computer lab usage (more equitable). Finally, Biology presented on their plan for Impaction. They discussed their process of deciding on a policy that took into account URMs and stated that their number of URMs would not be affected by the new proposed policy.
3. Climate survey: Hanna was to forward the most recent up-to-date survey. Jude brought copies of most recent survey and discussed feedback she had received by CODE members, especially Akutsu. Antonyappan suggested we ask for both surveys to be distributed – best of both so that things that not captured by one survey can be captured through the other. Discussion on which or both surveys combined would be best option.
